This is UNEVALUATED Information

25X1

The Tayshet - Bratsk railroad was a single-track. The embankment was sand and the ties were wooden. Along the railroad ran a telephone-telegraph suspension line consisting of separate wires, not a cable. The semaphores were not electric, and were activated manually. [redacted] this railroad can accommodate heavy trains with power-ful steam engines. [redacted] on it long trains carrying timber, occasionally drawn by two steam engines. [redacted]
